16. Please explain your ratings above, especially if you have AI tools for "other" types of work. *

Since I didn't know anything about how APIs work for Hugging Face, I had to use ChatGPT to figure out how. But I also had to scroll around Hugging Face carefully, especially when it comes to paying as I didn't want ChatGPT to mistakenly say I have to pay a large sum of money only to not get the service I wanted. I also had to use ChatGPT to explain CI/CD and look for ideas on what tasks to automate, ideas for the test file and how to debug the job issue with Lint. Finally, I also forgot how to create input bars with a list of preselected items so I had to use it to help with the currency section.
